### PROFILE

Full Stack Developer and Automation Engineer with 3+ years of experience building scalable web applications and intelligent automation systems. Currently at Aptli AI, engineering large-scale hotel revenue reconciliation and payment automation for platforms like Expedia, Booking.com, and Oracle Opera Cloud using Python, Playwright, Node.js, and React. Previously at Oracle Financial Services building enterprise-grade RESTful APIs with Java and Spring Boot. Proficient across the full stack — from React and Next.js frontends to Node.js backends, MongoDB and PostgreSQL databases, and AWS cloud infrastructure. Passionate about building systems that eliminate manual work and deliver real operational impact.

### SKILLS

#### FRONTEND

React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, HTML5, CSS3

#### AUTOMATION

Python, Playwright, Browser Automation, Data Pipelines, Workflow Automation

#### BACKEND

Node.js, Express.js, Java, Spring Boot, REST APIs, Spring Security

#### DATABASES & CLOUD

MongoDB, PostgreSQL, MySQL, AWS (S3, EC2), Vercel, Render, Firebase

### EXPERIENCE

#### Full Stack Developer & Automation Engineer

Aug 2025 – Present

**Aptli AI · Remote**

- Built large-scale hotel revenue reconciliation and payment automation systems for major OTA and PMS platforms including Expedia, Booking.com, Choice Hotels, SynXis, HotelKey, and Oracle Opera Cloud.
- Developed Python/Playwright automation frameworks handling complex browser workflows — invoice reconciliation, virtual card processing, payment posting, dispute handling, and AR management — significantly reducing manual operational effort.
- Designed and implemented scalable backend services using Node.js, TypeScript, and REST APIs to support reconciliation workflows, analytics, and operational automation.
- Built reconciliation dashboards and reporting interfaces using React, Next.js, Redux Toolkit, and Tailwind CSS for tracking revenue leakage, payment status, disputes, and operational KPIs.
- Designed and optimized MongoDB and PostgreSQL schemas, aggregation pipelines, and reconciliation data models for handling thousands of reservation, invoice, and payment records.
- Implemented robust error handling, retry mechanisms, logging, and audit trails for mission-critical financial automation processes.
- Leveraged AWS S3 and EC2 for automation execution, logging, and cloud storage; collaborated across product, operations, and engineering teams to improve reconciliation accuracy.

Freelance Software Developer

Sep 2024 – Present

Remote / Independent

- Built modern, responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) for clients across various domains.
- Designed clean, user-friendly interfaces with React.js, TypeScript, and Tailwind CSS ensuring smooth and engaging user experiences.
- Developed secure and efficient backend APIs with Node.js and Express, implementing authentication, role-based access, and data handling.
- Handled end-to-end project development — from planning and design to deployment and client handover on Vercel, Render, and Netlify.
- Communicated directly with clients to understand requirements and deliver customized, scalable solutions on time.

Associate Application Developer

Jun 2023 – Aug 2024

Oracle Financial Services Software · Bangalore

- Designed and developed scalable RESTful APIs using Spring Boot and Java; implemented data validation, error handling, rate limiting, and caching mechanisms.
- Leveraged Spring Security for authentication and authorization; used Spring Boot Actuator for monitoring and troubleshooting.
- Built responsive front-end components with React/Angular integrated via AJAX; implemented client-side validation and error handling.
- Designed relational database schemas using SQL with Spring Data JPA; optimized queries for performance and scalability.
- Participated actively in code reviews and cross-functional team delivery with product managers and designers.

EDUCATION

B.Tech — Instrumentation & Control Engineering

Jul 2019 – Jun 2023

National Institute of Technology Trichy (NIT Trichy)

CGPA: 7.24 · Science and Engineering

Higher Secondary School (Science Stream)

Apr 2015 – Mar 2017

Delhi Public School, Agra

Percentage: 87.2% · Mathematics, Physics, Chemistry

EXTRA-CURRICULAR

Handled end-to-end social media management for personal and small business accounts — including content creation, post-scheduling, copywriting, and engagement strategies to boost reach and visibility.
